

Miss Heather's Learning at Home Activity Two Ingredient Homemade Snow

Related **Science Lesson** Airst January 27, 2021

How to Make

We are going to make our own snow today. You may need help from a grown up to help you with this to get the measurements to make this snow. It's an easy two ingredient snow and it is so fun and smells so good. My students always love when we make this and it's one of my favorite winter sensory activities. It is so simple and so quick to make. The snow feels so smooth, smells good, and it is cool to the touch.

Materials:

- ½ cup of white hair conditioner
- 2 ½ cup of baking soda
- A large bowl for mixing

Optional: Add some glitter to make it sparkle like snow.

Directions:

1. Mix all ingredients together until well-blended and a moldable texture is achieved.
2. Add little animals and/or a toy snowplow.
3. Add a spoon to use as a shovel.

You will have hours of fun using your imagination!
