

Ms. Heather's Learning at Home Activity Balloon Caterpillar Print

Related Science Lesson Airst March 19, 2021 on WQLN PBS

How to Make:

Materials:

- Paint (red and green and yellow)
- 2 balloons
- Paper plates
- Marker for details
- Paper for eyes

Directions:

1. Blow up your balloons just a little bit so the bottom is a small circle. Tie each balloon to keep the air inside. Pour some red paint on one paper plate.
2. On your other paper plate, pour green and blue paint on the plate and pour them right on top of each other, but don't mix them up. This will give you a cool tie-dyed effect when you stamp them.
3. Dip the end of one of your balloons in the red paint and stamp it on the paper for your caterpillar's head.
4. Dip your other balloon in the green paint and stamp it on the paper in a caterpillar body shape.
5. When dry, either paint or draw on the details - antennae, eyes, nose, and legs.
