Ms. Valerie’s Learning at Home Activity

Opposites Picture Sort

Related Math Lesson December 14, 2021 on WQLN PBS

How to Make

Materials:

- Old magazine or catalogue
  (or you can print or draw pictures)
- Scissors
- Paper
- Marker or crayon
- Glue or tape

Directions:

1. Help your child find and cut out pictures of things that are opposites.
   Some examples: big/small, hot/cold, soft/hard, loud/quiet.
2. Draw a line down the middle of your paper.
3. Write the names of the opposites categories at the top of each half of the paper.
4. Have your child sort the pictures and glue them to the correct side of the paper.

If you don’t have magazines or catalogues, you could draw the pictures or print them out.
Another option is to use real objects from around your house to sort into opposites categories.
