Making Snow at Your House

Related **Special Education Lesson** Airs January 29, 2021 on WQLN PBS

How to Make

1. Let's talk about what snow is like. Go through all the descriptive words. (White, cold, sometimes crunchy, sometimes soft, at times will fall apart but other times it will pack together to make things like a snowball).
2. Talk about and show the ingredients needed.
3. Make the snow in the consistency that you think would work to make a snowball.
4. Build things with your snow!

Ingredients:

1. 1 cup of baking soda
2. 1 cup of shaving cream
3. A little water

Directions:

1. Mix 1 cup of baking soda with one cup of shaving cream in a large bowl. Mix with a fork.
2. Add a few drops of water until the mixture takes on a snow-like appearance.
3. You may need to add a little more baking soda and water until you get the consistency you need.
4. This does not stain or ruin surfaces. To contain the mess, you can use cookie sheets to have fun making things with the homemade snow.

Here's Another Idea

Take a white sock and stuff another sock inside of it to form a ball and use it to have a safe snowball fight inside!
