

Miss Heather's Learning at Home Activity Friendship Bracelets

Related Math Lesson Airs February 9, 2021

How to Make:

Materials:

- Scissors
- Pipe cleaner
- Colored plastic beads

Directions:

1. Cut pipe cleaner to fit your child's wrist for a bracelet.
2. Slide the beads onto the end of the pipe cleaner. Leave a small amount of space between them.
3. Then fold a small end section of pipe cleaner over the bead closest to it.
4. Holding the pipe cleaner in place, slide the second bead over the folded piece of pipe cleaner until it is right next to the first bead. This creates a secure end of the bracelet to them.
6. When you have all of your beads threaded, take the end of the pipe cleaner and thread it through the first secured bead on your pipe cleaner to create a bracelet.
7. Lastly, trim any excess pipe cleaner from your bracelet and enjoy!

You can even do a math lesson while making these and have them work on patterns while placing the beads on the bracelet (For example: red, green, blue | red, green, blue | red, blue, green)
