

Miss Heather's Learning at Home Activity Rocket Ship Names

Related ELA Lesson Airs February 15, 2021

This craft is great for helping your preschooler with their fine motor skills. Cutting with scissors, gluing, writing letters and placing the shapes in order will keep them busy. If your child isn't quite ready to use scissors, then cut out the shapes for them. You will need squares in an array of colors – one for each letter of their name. You will also need a triangle for the top of the rocket ship and strips for the flames.

How to Make:

Materials:

- Scissors
- Glue
- Crayon or Marker
- Colored paper for squares, triangle, strips for flames at the bottom

Directions:

- First cut out the number of squares in your child's name
- Then have your child write each letter of their name on one of the squares
- Cut out strips for the bottom of the rocket (flames)
- Glue the squares on the paper in a vertical fashion
- Add the triangle to the top of the rocket and the strips of paper at the bottom of the rocket to look like flames

You can place the squares with letters out of order and have your child practice putting the letters in the correct order to make their name.
